Retail price, unit Alibaba cost, MOQ restock cash, and contribution ranges. To us, Ship, and Keep are planning ranges (light freight → heavy freight). Keep floors at \$0.00 when heavy freight would erase contribution. Brush and glove stay restock lines; NestPaw sells them as the Shedding Brush Kit.

Chance of profit vs loss

Each unit's Keep depends on unknown freight. We treat inbound To us as uniform \$3.00■\$12.00 and US Ship as uniform \$5.00■\$12.00 (independent draws, 10,000 simulations). Each green or red dot is one freight draw for that SKU, ordered left→right by Keep. Green = profit after fees; red = loss. Dash = break-even.

Assumption only — not measured carrier rates. Solo-item order, Stripe 2.9%+\$0.30, 3% returns pad, ship fee \$5.50 when sell is under \$40. Brush kit components are omitted (sold only as the kit).
